

DINESHKUMAR PURUSHOTHAMAN

Full Stack MERN Developer

Chennai | 9087065451 | dineshkumar18251@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full Stack MERN Developer with 4+ years of experience building and deploying scalable, secure web applications using React.js, JavaScript (ES6+), Node.js, Express.js, and MongoDB. Proven track record delivering secure REST APIs for financial platforms and AI-powered applications, with expertise in authentication, authorization, and microservices architecture. Hands-on experience integrating LLM APIs using LangChain, Retrieval-Augmented Generation (RAG), prompt engineering, and vector search (Pinecone) into production-grade AI document processing and chatbot workflows. Strong background in Agile/Scrum delivery, performance optimization, and end-to-end full stack development.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Redux Toolkit, React Hooks, Bootstrap, Responsive Web Design, Axios, Fetch

Backend: Node.js, Express.js, RESTful APIs, Microservices Architecture, JWT Authentication, OAuth, WebSocket, Multer File Upload, Middleware Development, API Integration

Database: MongoDB, Mongoose, Aggregation Pipeline, Query Optimization, Schema Design, Indexing, Redis (Caching)

AI & LLM Technologies: Generative AI, Agentic AI, Large Language Models (LLMs), OpenAI API, LangChain, Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents, Embeddings, Vector Search, Semantic Search, Vector Indexes, AI Document Processing, AI-Powered Data Extraction

Cloud & DevOps: AWS (EC2, S3, Amplify), Docker, Jenkins, Azure DevOps, CI/CD Pipelines, Kong API Gateway, SonarQube

Tools & Version Control: Git, GitHub, Bitbucket, VS Code, npm, Postman, Jira

Testing & Quality: Unit Testing, ESLint, Debugging, Code Review, Performance Optimization, Error Handling, Logging

Methodologies: Agile, Scrum, Software Development Lifecycle SDLC, Clean Code Practices

PROFESSIONAL EXPERIENCE

Full Stack Developer, Longshore Labs Private Limited

Dec 2024 – Aug 2026

Project: ALPINE – Fund & Investors Onboarding and Compliance Platform

- Fund & Investor Onboarding Module:** Developed a fintech platform for fund and investor onboarding with end-to-end onboarding workflows covering CDD/KYC, PEP, sanctions, risk assessment scoring, regulatory screening, approval processes, and investment transaction processing using React.js, Node.js, Express.js, and MongoDB.
- Financial Reporting & Billing Module:** Built a real-time financial reporting engine supporting complex reports for share buy/sell transactions, investor statements, transaction history, billing, invoices, and financial statements.
- AI Smart Onboarding Module:** Built an AI-powered document processing solution using OpenAI API to automatically extract person/individual and entity/business information from uploaded documents, reducing manual data entry.
- AI Document Intelligence Module:** Implemented an AI-powered document Q&A solution using RAG, embeddings, vector search, and LLMs, enabling users to query uploaded documents using natural language and retrieve relevant information.

Tech Stack: React.js, JavaScript, Node.js, Express.js, Bootstrap, MongoDB atlas, OpenAI API, LangChain, Vector Search, JWT.

Application Developer, IppoPay Technologies Private Limited

Jul 2022 – Sep 2024

Project: TUTELAR – Fraud Prevention Platform

- AML & OGM Module:** Developed risk assessment workflows with PEP, sanctions, adverse media, and fraud-risk checks before onboarding, along with ongoing monitoring (OGM) for continuous risk assessment.
- Dispute Module:** Built manual and bulk dispute creation using complex CSV uploads with validation, parsing, and data processing; implemented BullMQ and Cron Jobs for background processing and automated merchant reminders.
- Ticketing Module:** Developed a ticketing system for ticket assignment, prioritization, tracking, status management, and workflow handling, with customizable ticket categories, priorities, and user access controls.
- Web3 Module:** Developed Web3 wallet functionality for sending and receiving tokens through third-party APIs; secured web and mobile APIs using Kong Gateway and JWT.
- Dynamic Template Module:** Developed a template management system enabling users to create, customize, configure, and manage reusable templates based on different business requirements.

Tech Stack: React.js, JavaScript, Node.js, Express.js, MongoDB, Mongoose, Bootstrap, REST APIs, JWT, Kong Gateway, BullMQ, Cron Jobs, CSV Processing, SonarQube, Unit Testing, Git.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA) - A.M. Jain College, University of Madras – 79%

Jun 2014 – Apr 2017

Web Design and Development Course — FITA Academy (3-Month Program)

Feb 2022 – May 2022
