

DINESHKUMAR PURUSHOTHAMAN

FULL STACK DEVELOPER

9087065451 | dineshkumar18251@gmail.com | www.linkedin.com/in/dk18251 | Portfolio Website | Chennai

PROFILE SUMMARY

Full Stack Developer with 4 years of experience specializing in the MERN stack (React.js, Node.js, Express.js, MongoDB) and JavaScript. Proficient in web application architecture, RESTful API development, database optimization, and responsive user interface design. Experienced in writing clean, maintainable code, implementing Agile methodologies, and delivering scalable software solutions. Available for immediate joining.

WORK EXPERIENCE

Full Stack Developer, Longshore Labs Private Limited – Chennai

Dec 2024 – Present

ALPINE – Fund / Investors Onboarding & Compliance Platform

- A financial platform handling funds, investor onboarding, KYC/AML workflows, and transaction processing.
- Built reporting and statement engines to generate real-time financial statements and transaction histories reports for clients and investors.
- Built AI onboarding features using OpenAI to automate contact and business entity verification.
- Created an AI document tool allowing users to upload files and query contents via OpenAI.
- Designed secure REST APIs using Node.js, Express.js, and MongoDB for scalable data processing.
- Managed Agile sprint cycles, including requirement gathering, task assignment and release documentation.

Application Developer, IppoPay Technologies Private Limited – Chennai

July 2022 – Sept 2024

TUTELAR – Fraud Prevention Product

- Worked on Tutelar, a fraud prevention platform designed to detect, prevent, and manage online fraud risks through automated workflows and risk assessment solutions.
- Developed and enhanced AML risk assessment modules to analyze individual and business profiles, evaluate risk factors, and support data-driven decision-making.
- Implemented Dispute Management workflows enabling users to raise, track, and manage fraudulent transaction disputes with status updates and resolution processes.
- Built and maintained a Ticketing Management System for issue creation, assignment, tracking, and streamlined communication between users and support teams.
- Developed scalable frontend and backend features using MERN stack technologies (React.js, Node.js, Express.js, MongoDB) following clean coding practices and Agile methodologies.

Associate - InDesign, TNQ Technologies Private Limited – Chennai

July 2017 – April 2022

- Experienced in book layout design, content formatting, and preparing publication-ready files for print and online platforms while ensuring quality and consistency.

EDUCATION
